- Find old team on linkedin. Offer a lumch
- Find the app in production
- Run the app
- building new features is fun!
- is there anything we can do to make the legacy code more fun?
- exploratory testing
- Talk with business about wishes
- Setup dev environment
- coding in flow is fun!
- improve flow with tests and observability
- smallest possible change
- setup pipeline
- Implement any change
- Run tests if they exist
- Explore the repo, read the PR merged, comments, etc... see the commit graphs
- Make prototype for new feature requests in a separate app to gather feedback from business
- Create a new branch and let's start to break components
- make small groups, brainstorm "fun" small tasks
- ask team to describe what work is fun for them
- split into solos or small groups, do something fun (related to the project) for an hour, then share
- write and run 1 test
- build/run the app on a dev box
- apply "easy bit" Thinkie!
